CSR 2018

Corporate Social Responsibility 2018

It has always been a practice of Raquel Pawnshop, Inc. to conduct Corporate Social Responsibility (CSR) Activities through promoting inspiration to pupils of Elementary Schools in Quezon Province.

Last November 7-8 2018, The Management of Raquel Pawnshop, Inc. with some employees visited Brgy. Lakawan Tayabas City and Reymar Compound Elementary School in Brgy. Gulang-Gulang Lucena City to conduct a short program for the pupils of Lakawan, Mate and Pandakaki Elementary Schools in Tayabas City and Reymar Compound Elementary School in Brgy. Gulang-Gulang, Lucena City respectively.

This year, RPI prepared coin banks that were given to the pupils of the participating schools to instill the value of saving money. The excitement of the pupils was evident during the program as well as our gratitude and appreciation to be given this kind of opportunity of inspiring the youth of today.

Aside from giving of coin banks as gift to the pupils, RPI also held a simple program for them which included fun games and entertaining intermission numbers. At the end of the day, another CSR Activity turned out successful, thanks to the dedicated team of RPI headed by the Management who continuously commit and persevere to provide only the best for its surrounding community.

We all live for ourselves but living for others and doing something for them is a different feeling altogether. Bringing a smile to these young people's lives give a certain kind of happiness that can never be replaced.

One should never forget the importance of society and environment in our lives. Corporate social responsibility gives an opportunity to organizations to work towards the betterment of the society and make it a better place to live. // Jahn Carla A. Bondad

5 SIMPLE WAYS TO PROTECT YOUR PERSONAL DATA ONLINE

Today's world is totally different from the non-online world in the past. We are all connected now on what we call the Internet. We become so dependent on it and on what it can bring into our lives but little do we know because of this, our personal data is actually being threatened.

Through all the data sharing done particularly in the social media world, our personal data can get compromised or hacked easily. Let's protect ourselves from it through these 5 simple ways to protect our personal information online.

1. Password-Protect everything

Put passwords in all your devices (cellphones, laptops, personal computers etc.). Set strong passwords in your online accounts and change your password regularly and never use the same password on multiple accounts.

2. Keep your computer virus-free

Almost every day, there are new computer viruses coming out. Updating your anti-virus application on a regular basis can help prevent your data getting compromised and hacked.

3. Be careful what you share on social media

Don't post too much information about yourself. Always be discreet and selective on the things you want to share about yourself. Remember that sharing too much publicly on social media may put your personal information at risk.

4. Don't fall for scams

There will be circumstances when you will receive a text message or an email from someone pretending someone you know, and ask questions about your personal information such as your home address, contact number or even details on your bank accounts. When this happens, validate the inquiry first before giving out any information. Always make sure that you are giving your personal data to the right people and for the right reasons.

5. Read privacy policies

Look for company privacy policies. This will tell you how companies or websites maintain accuracy, control and security of the personal information it collects, how it uses the information or whether they provide information to third parties and your rights as data subject.

Together, let's learn how to protect our personal information in this world where data of almost everyone and everything are available in just one click.
